

Specialization project at the Department of Telematics (for prof.)

Project description

Submission:

Students have to submit their final project description on It's learning.

On It's learning, a folder named with the project number has been created for each project in the TTM45x1¹ folder corresponding to the student's specialization. Note that you may be responsible for projects taken by students with different specializations and therefore you may need to access more than one TTM45x1 folder to find all the projects you are responsible for.

To find the number of the projects you are responsible for and the specialization course of the students taking those projects, check http://item.ntnu.no/_media/student/project/2011/project_2011_by_professor.pdf.

Submission deadline for students:

Sept. 22 2011 (unless otherwise agreed upon)

Assessment:

On It's learning, access the course corresponding to the specialization of the student(s) taking the project. Access then the folder whose name is your project number. Access finally the assignment named *Prosjektbeskrivelse*. Click 'show/'vis' to read and assess the project description.

Assessment deadline:

Within 2 weeks after the submission deadline has passed, that is Oct. 6 2011 (unless otherwise agreed upon)

Project report

Submission on It's learning:

Students have to submit their report on It's learning (*Prosjekt* assignment). Rationales for using It's learning are: electronic submission, control of the submission deadline, and plagiarism control.

Submission deadline:

Dec. 21 2011 12:00 (unless otherwise agreed upon)

Submission deadline extension:

The student or you may request a deadline extension in case of illness, particular social conditions or specific technical issues (incl. late delivery of equipment necessary for the project). To do so, fill in the dedicated form available at http://www.item.ntnu.no/_media/student/project/project_deadline_extension_request.pdf and submit it to Laurent Paquereau (B215). Note that the application must be submitted *at least* one week prior to the submission deadline otherwise applying.

Instructions for students

Instructions for students can be found at:

http://www.item.ntnu.no/_media/student/ITEM_project_instructions_student.pdf

¹ x is equal to 1, 2, 3, 4 or 5 depending on the student's specialization track.
